

WORKSHOP AIM

The workshop intends to be an *open space* where anyone wishing to say something on E-Learning and to learn “secrets” about the application in the organic farming sector can meet. The aim of workshop activities will be:

- a) looking around European e-learning experiences for the organic farming;
- b) spreading the results of the most important EU projects;
- b) spreading best products and practices for e-learning realized by Universities, Research Centers, SMEs, in the EU project area;
- c) favouring the meeting among every Body (such as private and public Institutes, Universities, Schools, SMEs, Research Centers, and so on...) interested in the use of new Information and Communications Technologies.

Will be update the Charter on E-Learning for Environmental education, with the basic ethical and operational principles, signed by the international experts in Naples in 2004.
